City of Sedalia Schedules Wind Storm Debris Pick-up

City crews will be working this week Aug. 19 through Aug. 23, 2019 to remove tree limbs and branches from public property and rights-of-way resulting from the recent wind storm damage that occurred late last week and over the weekend. Wind damage appeared to be localized and within an area between W. 3rd Street and W. 20th Street and from S. Grand. Ave. to S. Thompson Blvd. Residents having tree limbs and branches downed by the recent storm event should make sure those limbs and branches are moved to the right-of-way along the curb and away from overhead lines for collection.

Residents outside the localized area identified above having downed limbs and branches from the recent storm may call for pick-up at (660) 827-7820 between 7:00 a.m. to 3:30 p.m.

Residents may also take tree and yard waste debris to the City's Materials Management Site located at 27882 Highway U from 7:00 a.m. to 5:30 p.m. The Materials Management Site is open daily, Monday through Sunday, with the exception of City holidays. The next City Holiday is Labor Day on Sept. 2, 2019 when the site will be closed.

Collections are weather dependent and may be delayed due to rain.

If you have questions about the storm debris clean-up, please feel free to contact the Public Works Department at (660) 827-3000 ext. 1166.
