- Staff applied for and received a grant from the Missouri Division of Tourism to fund wayfinding signage throughout Sedalia. As part of the implementation process, the project was put out for bid. Two bids were submitted, however, both were deemed non-compliant. One bidder failed to acknowledge the required addendums, both used incorrect bid forms, and neither signed and dated the IFB signature page as required. Following consultation with the granting agency and the Sedalia Convention & Visitors Bureau, it was determined that there was not sufficient time remaining in the

current grant cycle to rebid and complete the project successfully. The City was subsequently authorized to reapply for the grant in the next state fiscal year which provides a full grant window from July 1, 2025, through June 30, 2026. The City has since been notified that it has been re-awarded the grant and can move forward with the project with a new bidding process. Staff recommends that Council formally reject all bids received related to the fabrication and installation of wayfinding signage. The project will be rebid under the new grant cycle, allowing adequate time for competitive bidding and project completion. Motion by Oldham, seconded by Marshall to formally reject Wayfinding bids. All Present in Favor. Robinson was Absent.

To support this redevelopment, which includes the Boys & Girls Club of West Central Missouri, future residential apartments, and additional non-profit service facilities, staff recommends approval of an Infrastructure Development Agreement with Holland Holding Company, LLC. Under the terms of the agreement, the Developer will construct stormwater improvements, sidewalks, curbs, and install street lighting along the South and West edges of the project site. These improvements will extend the downtown streetscape and address long-standing drainage issues along Mill Street. The City will reimburse the Developer for up to \$525,000 in certified infrastructure construction costs, amortized over ten years. The City will directly provide the materials and labor for paving Mill Street and supply the light fixtures, which will be installed by the Developer.
